## Wound Care Program

**BSA ComPassion's Wound Care Program** is designed to treat the full spectrum of skin care needs from minor skin irritations and injuries to complex wounds. BSA ComPassion's wound experts will assess the skin condition and the cause of the problem, report the patient's condition to the physician and make a recommendation for treatment. Our nurses undergo an extensive wound orientation and education program including the latest product advances and industry best practices including Wound VAC certification. BSA ComPassion has had great success in treating non-healing and problematic wound patients at home in a comfortable and cost effective environment.

### Types of Wounds We Treat:

- Diabetic Wounds and Ulcers
- Surgical Wounds
- Pressure Ulcers or Bed Sores
- Arterial Ulcers
- Venous Stasis Ulcers
- Traumatic Wounds
- Skin Tears
- Skin Inflammation and Rashes
- Infected Wounds

Our clinicians work in conjunction with the physician and local wound care center and continually evaluate wound healing and response to treatment. Preventing infection or other complications and helping the patient heal and return to their normal activities of daily living are main goals of the program. Patient education is a major component to our Wound Program. Education is tailored to the patient's individual needs and focuses on eliminating factors that cause skin problems or interfere with healing. Education on preventing infection, relieving pressure, controlling diabetes and the dietary nutrients needed for healing are included in the individualized care plan.

### Components of our comprehensive wound program:

- Wound Care Certified RN on Staff
- Digital Photography Program
- Compression Therapy
- Ostomy Care Education
- Pressure Relief Education
- Infection Assessment and Intervention
- Registered Dietitian Support
- Negative Pressure Certified RN's
